

How to rescue a sonorsnare

1.The swinger snare is a great sounding snare but has plastic lugs that use to break.No new lugs are available.No problem you can use ST-lugs.

2.You must drill the 2 holes to 6mm

3.You mount the special lugs-----

4.-----and the snare is back on the road

Costs about 40.- Euro

4.-----or see this picture made by

Vladimir Korenić

he did that restauration on a swinger snare
