

# Screwdriver

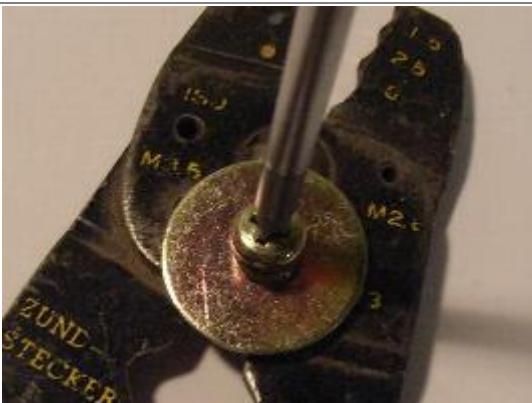

Big Problem!!!!  
the screw is too long  
you don't have a short one

you can use this tool to cut  
off a piece of the screw

you have threads for the most used  
screws. Here we have M2, M3, M4, M5, M6  
M4 and M5 is what you need most

put the screw in.....

..in the right lenght you need to cut

CUT!! watch your fingers!!!

you need a little power but please

watch your fingers

If you are succesfull you can unscrew  
the screw and you have the 2 pieces now

available for 7 to 8.- in every shop or just Google for
